CUSTOMER TREATMENT INFORMATION SHEET FOR: **Bees & Wasps**

Updated 2011

INSIDE TREATMENT

- Arrange for access to attic and crawl space areas.
- Fish tanks should have the air system unplugged. Cover the tank with towels.
- Treatment DOES NOT harm houseplants.
- Be aware if an aerosol fog is necessary to control bee activity inside the home, you may need to vacate the house for 1-2 hours (including pets).

AFTER INSIDE TREATMENT

- Open windows and allow house to air out if any odor is noticeable.
- If humidity is high, you may want to run a dehumidifier or air conditioner in the house to help eliminate any persisting odor.
- If any white dust or visible residues are apparent after treatment, this should be cleaned up with a vacuum cleaner, dust cloth or damp disposable rag.

OUTSIDE TREATMENT

- Siding should be power washed or cleaned **PRIOR** to treatment, if needed.
- **ALL WINDOWS SHOULD BE CLOSED DURING TREATMENT.** Windows may appear streaked after the treatment but will wash easily. (You may wash windows 2 hours after the treatment has been completed or anytime thereafter.)
- Patio furniture and potted flowers may be moved away from patio or porch to avoid overspray.
- The treatment does not harm shrubbery, flowers, etc.
- Outside pets should be kept at least 25 feet from the house during treatment.
- Keep children and pets away from the outside treated areas until dry.

A \$25 (per unit) fee will be added to the treatment cost when service is cancelled with less than 24 hours notice or the service cannot be properly completed due to lack of preparation or accessibility issues.
